

# ChillBusterVET™

## Patient Warming System

A safe, temperature-controlled warming system designed to help prevent hypothermia during and after surgical care, reducing the chance of infection and assisting in recovery.

---

### ChillBusterVET Advanced Safety Features Include:

- Unique enamel-coated heating element ensures even heat distribution
- Protective, waterproof disposable covers help reduce cross-contamination risk and hot spots
- Custom-engineered heating pad electrical cable strain relief for longer life and durability
- Automatic safety shut-off for worry-free use
- Limited one-year warranty

### ChillBusterVET Patient Warming Blanket System

Part No. 150-8201-02

A flexible blanket designed to conform to the patient for the most effective warming during or after a surgical procedure.

### ChillBusterVET Patient Warming Mat System

Part No. 150-8201-52

A flat, sturdy mat designed for crate use or on surgical tables. Can be used alone or in combination with the blanket system for additional warming.

### ChillBusterVET Patient Warming System Disposable Covers

Part No. 150-0015-02

Protect your warming systems with our waterproof, disposable covers, designed to reduce contamination, hot spots and extend unit life. Covers fit both blanket and mat warming systems.
